

The advertisement features a central image of a SIMATIC S7-1500 PLC rack with a monitor displaying the TIA Portal software interface. The monitor shows a 'First step' dialog box with the message 'Project was opened successfully. Please select the next step:' and a 'Main' menu with options like 'Configure a device', 'Write PLC program', and 'Configure technology objects'. The PLC rack has a small screen showing 'RUN' status and 'Overview CPU 1516-3 PN/DP'. The Siemens logo is in the top left corner.

SIMATIC S7-1500 Starter Kit

Save more than 40% with our Starter Kit over individual component prices

The ultimate plus in automation

The new SIMATIC S7-1500 controller sets new standards in **Power** and **Efficiency** for maximum productivity.

Power

The SIMATIC S7-1500 offers advanced system performance and PROFINET as a standard onboard interface. PROFINET is the new standard for performance. Short system response times mean shortened machine cycle times – increasing productivity and yielding faster return on investment.

Efficiency

The SIMATIC S7-1500 is designed for optimal usability and maximum efficiency. The controller can be installed, connected, and commissioned quickly and easily. Engineering, project planning, and new functionalities are easier than ever due to the seamless integration with the Totally Integrated Automation (TIA) Portal engineering software.

Discover the new SIMATIC S7-1500 and get started today!

S7-1500 Starter Kit includes:

- SIMATIC S7-1500 CPU 1511-1 PN
- SIMATIC Memory Card, 4 MB
- Digital input module DI 16 x 24 V DC
- Digital output module DQ 16 x 24V DC/0.5 A ST
- Mounting rail 160mm
- Front connector
- STEP 7 Professional V13 software, 365-day license ¹⁾
- Power supply PM 70W 120/230 V AC
- SIMATIC TOP connect: Front plug-in module, push-in
- SIMATIC TOP connect: Connecting cable
- SIMATIC TOP connect: 3-wire connection module
- Standard Ethernet CAT 5 cable
- Screwdriver

**To order, please see your local Siemens Distributor.
\$1500 list, order # 6ES7511-1AK01-4YB5**

¹⁾ Full version valid for 365 days. During this time, all the functions of the full version are available – updates and service packs can also be installed. After the 365 days have expired, the trial software can no longer be used to develop PLC code, however all files created with the 365 day license remain fully functional and running. Further code development can be done upon purchase of a fully licensed copy of the TIA Portal.
